Organised by:
Higher Education Department
Government of Uttar Pradesh

In coordination with:
AISHE, Department of Higher Education
Ministry of Education, Government of India

DR. RAM MANOHAR LOHIYA
NATIONAL LAW UNIVERSITY, LUCKNOW

Overview

A **State-Level AISHE Workshop** was organised at RMLNLU, Lucknow, to strengthen the processes of higher education data collection, verification, submission and institutional data management. The workshop brought together University Nodal Officers and officials to address practical issues related to the AISHE Data Capture Formats (DCF), portal processes, data validation and reporting.

The programme commenced with registration and inaugural activities, followed by addresses from senior officials. **Shri Yogendra Upadhyay, Hon'ble Minister of Higher Education, Uttar Pradesh**, emphasised that accurate, timely and verified higher education data is essential for effective policy formulation, resource allocation and future planning. He stressed the importance of verifying information against original institutional records and undertaking cross-verification before final submission.

Technical sessions provided guidance on **AISHE DCF and portal-related processes**, while interactive discussions enabled University Nodal Officers to raise institution-specific issues concerning data collection, reconciliation, validation and submission.

Shri Amit Kumar Ghosh, Additional Chief Secretary, Higher Education, highlighted that AISHE data management is an institution-wide responsibility, rather than the responsibility of the nodal officer alone. Emphasis was placed on maintaining consistency between university records and AISHE submissions, reconciling affiliation records, preventing duplicate reporting, reviewing unusual variations and undertaking gap analysis for improved data quality.

Key takeaway

Data Accuracy: AISHE data should be based on authentic institutional records.

- **Timely Submission:** Institutions should initiate data collection and verification without waiting for the final deadline.
- **Institutional Ownership:** AISHE reporting requires coordinated participation of relevant institutional sections.
- **Data Reconciliation:** University records and AISHE submissions should be systematically matched.
- **Cross-Verification:** Data should undergo internal verification before final approval and submission.
- **Gap Analysis:** Institutions should analyse variations and identify data gaps rather than merely upload information.

- **DCF & Portal Readiness:** Nodal Officers should maintain clarity regarding DCF requirements and AISHE portal processes.
- **Zero-Pendency Approach:** Institutions should ensure timely completion and avoid exclusion of eligible and operational institutions from the survey.

Outcome

The workshop provided a valuable platform for knowledge sharing, technical clarification, and resolution of practical AISHE-related challenges. It reinforced the importance of establishing systematic institutional mechanisms for data collection, verification, documentation, reconciliation and timely submission. The discussions contributed towards strengthening the quality, consistency, reliability and institutional ownership of higher education data.

Key Issues:

The open-house and problem-solving sessions addressed practical challenges relating to DCF interpretation, student and faculty data reconciliation, programme and affiliation mapping, institutional records, portal-related issues, validation, documentation, data consistency and submission procedures. University representatives shared their specific concerns and suggestions for strengthening the AISHE reporting mechanism.

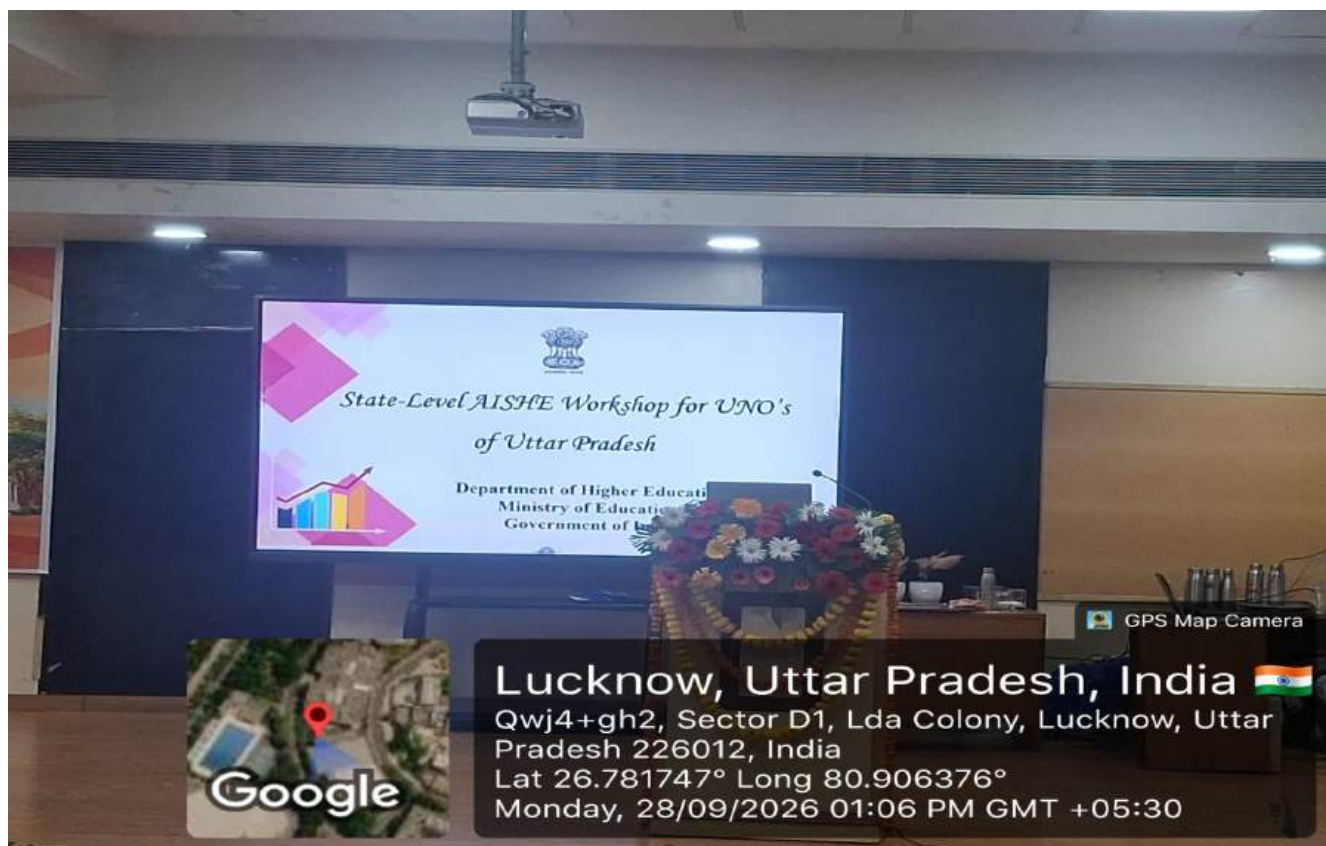

Conclusion

The workshop reinforced the need for an institution-wide data management system, regular reconciliation of departmental records, systematic verification before AISHE submission, identification of data gaps and prevention of duplication or inconsistencies.

The workshop concluded with discussion of action points and the way forward, followed by certificate distribution and closing formalities. Overall, the programme contributed towards strengthening the accuracy, consistency, timeliness and institutional ownership of higher education data reporting in Uttar Pradesh.

Technical Session- By MoE Experts and AISHE Cell Uttar Pradesh

State Level AISHE Workshop at RMLNLU Lucknow on 28.08.2026

Changes incorporated in AISHE 2025-26

- Added new questions in Basic Details tab :-
 - (i) Is this an institution specifically for Divyang individuals?
 - (ii) Whether the University has Constituent/University College?
 - If "Yes" is selected then a grid will appear and list of all registered Constituent colleges will be shown in the grid and the portal will provide option to fill data of data of their Constituent colleges under the University DCE.
 - (iii) Whether institution has enrolled transgender students?
 - (iv) Whether the institution is offering Part-time PhD programme?
- In Details of Programmes replaced the question "Is this program being offered in more than one language as a medium of instruction?"
- Added a new question "In how many languages the institution examination be conducted?"
- Incorporated new validation in Student's enrolment that the **First Year Enrolment can be maximum 10% higher than the Total Intake Capacity of the programme.**
- A validation added in transgender column that maximum 5% students of the total student entered.
- In Teaching Staff details module Year spent in other than teaching jobs has been added.
- Added Transgender category in Teaching Staff Details module.
- Added a validation in Expenditure module that Expenditure can be maximum 10% higher than the Total Intake Capacity of the programme.
